

ARCO LDM: Legacy Data Migration

Our Partner: "ArcoInfo completed the conversions and storage of our client's obsolete and expensive to maintain data *flawlessly*. The results saved our client over \$500,000 and the relationship is now stronger than ever."

Saving you obsolete software maintenance fees via legacy data conversion

Scenario

M&A, consolidation and corporate growth have been reshaping the landscape and many organizations are switching their legacy data systems to another vendor to improve the organization's performance, the quality of service and reduce delivery costs. The problem is that these companies still need to access their historical client data and be able to search, extract and retrieve the information in the current format, while the organization continues to operate.

Benefits

- ✓ Robust Document Data Search & Retrieval
- ✓ High Volume Ingestion & Processing
- ✓ Utilization of RPA, AI, IoT applications etc.
- ✓ Integration with your existing platforms

Highlights

- Low cost of entry, no CapEx
- Industry and Software agnostic
- Flexible, scalable and customizable
- Future-proof technology

About ArcoInfo

With over 30 years of experience serving 1500+ clients globally, ArcoInfo has the skills necessary to integrate your unique legacy software and hardware systems. Discover the hidden value in all your digital information with full integration to your existing platforms via our integrations team.

ArcoInfo...we bridge the gap between the past, present and future.
